Today's "AUXILIARY"

The United States Coast Guard Auxiliary is the uniformed volunteer component of the United States Coast Guard ("USCG") and was established on June 23, 1939 by an act of Congress as the United States Coast Guard Reserve. Congress authorized the Auxiliary to support all USCG missions, other than those related to direct engagement in either law enforcement activities or military combat operations. Our missions include safety patrols, search & rescue, regattas, ATON verification, vessel safety checks and public education.

COME JOIN OUR RANKS!

Today's U.S. Coast Guard Auxiliary, with nearly 32,000 men and women, is a unique force that carries out an array of responsibilities touching almost every facet of the U.S. maritime environment.

MOBILE APPS & SAFE BOATING

While the marine radio is still the primary tool of communication, smartphones can be a valuable asset to the recreational boater. Smartphone APPS offer a myriad of resources to aid boaters in such areas as navigation, marine weather, knot tying, anchoring, vessel towing services, AIS, tides, first aid, and a multitude of other uses. Search in your APP Store to find specific products that will help make you a safer mariner.
